

HCG Mixing Instructions

WARNING: IF YOU ARE OR MAY BE PREGNANT OR HAVE RECENTLY BEEN DIAGNOSED WITH CANCER, “DO NOT USE” HCG.

Mixing Instructions: (Once reconstituted the vial must be refrigerated.)

Slowly inject 5ml (Large syringe to the 5 mark) of Bacteriostatic Water into the vial of HCG (dry powder) slowly.

**DO NOT
SHAKE**

You may roll the vial gently back and forth between your hands.

It is recommended that you take the injection the same time every day to maintain the HCG level. Morning is best.
